👤 EXECUTIVE SUMMARY

Computer Engineering graduate and **Full-Stack Developer** specialized in architecting scalable enterprise systems, automated business workflows, and responsive web platforms. Proficient in **TypeScript, Vue.js (2/3), React, Next.js, PHP / Laravel, Node.js, and Supabase / PostgreSQL / MySQL**. Proven track record in translating high-level business logic into production-grade software solutions with clean code, robust database modeling, and intuitive UI/UX.

🔗 CORE COMPETENCIES & TECH STACK

Frontend Engineering:	Vue.js (2 & 3), TypeScript, React, Next.js, Nuxt.js, Tailwind CSS, JavaScript (ES6+), HTML5/CSS3, Pinia, GSAP
Backend & APIs:	PHP (Laravel), Node.js, Express.js, RESTful API Design, JWT Authentication, Role-Based Access Control (RBAC)
Databases & Cloud:	Supabase, MySQL, PostgreSQL, MongoDB, SQLite, Firebase Firestore, Relational Data Modeling & Optimization
DevOps & Tooling:	Git, GitHub, Docker, Postman, Vercel, Netlify, Electron (Desktop Apps), Twilio SMS API, CI/CD Pipelines

🏢 PROFESSIONAL EXPERIENCE

Web Developer — ES Print Media Inc. FULL-TIME 2024 — Present | Philippines

- Engineered internal enterprise web tools that automated print shop workflows, document preparation, and customer payment tracking.
- Architected the **ES Print Check Monitoring System**: Built a production-grade financial tracker for post-dated checks (PDC), holds, bank returns, deposits, and multi-branch customer collections using Next.js, Supabase, and TypeScript.
- Developed the **ES Print Sales Workspace & Quoter**: Designed dynamic machine catalog browsers, installment amortization calculators, and one-click PDF quotation exports.
- Implemented **Service Request Monitoring**: Streamlined tracking, ticket assignment, and field technician dispatch for machine maintenance.
- Optimized **Database Schemas & APIs**: Designed normalized relational databases and secure REST endpoints with sub-second response times.

Full-Stack Developer — Independent Practice CLIENT WORK 2023 — Present | Remote

- Delivered end-to-end web and desktop software solutions for commercial clients across various business industries.
- Architected the **SPMT (Staff Performance Management Tracker)**: Built an enterprise HR portal managing staff evaluations, training modules, official memorandums, and departmental analytics using Next.js and Supabase.
- Engineered **Cross-Platform Basketball Scoreboard App**: Built with Electron, React, and TypeScript featuring match clocks, shot clock controls, and live team stats.
- Developed **Integrated Farm Management & E-Commerce**: Built animal breeding cycle records, medical logs, budget management, and client ordering.

📁 FEATURED ENTERPRISE & PRODUCTION PROJECTS

ES Print Check Monitoring System PRODUCTION Next.js • TypeScript • Supabase • Tailwind CSS Financial management system for tracking post-dated checks, deposits, hold requests, and multi-branch collection pipelines.	Staff Performance Tracker (SPMT) ENTERPRISE React • Next.js • Supabase • Tailwind CSS Web-based HR performance portal for employee evaluations, training modules, staff memos, and real-time operational analytics.
ES Print Sales Portal & Quoter PRODUCTION TypeScript • Next.js • Supabase • Tailwind CSS Interactive sales catalog, quote generator, and installment calculator for machine sales and customer closing documentation.	Basketball Scoreboard Desktop App DESKTOP APP Electron • React • TypeScript • Tailwind CSS Cross-platform desktop application for sports management with live match timers, shot clock controls, and statistical tracking.
ES Print ERP & Production System ENTERPRISE Vue.js 3 • PHP Laravel • MySQL • REST APIs Resource management platform with automated job order workflows, production pipelines, invoicing, and role-based permissions.	ES Print Service Request Monitoring INTERNAL TOOL TypeScript • Next.js • Supabase • REST APIs Service monitoring dashboard for tracking, assigning, and resolving client machine repair requests and field technician dispatches.

🎓 EDUCATION

B.S. in Computer Engineering (BSCpE) 2018 — 2022
STI College Batangas — Batangas City, Philippines
Thesis Project: Automated machine for eco-friendly bricks with microcontroller control.
